Before you start, check your **Color Settings**: for **CMYK**, select **"U.S. Sheetfed Coated v2"**.
Open the Layers Palette. Place your design on the **Design** layer.
Use the layer **safe zone & instructions** for reference only and delete it before submitting to Overnight Prints.
Keep all text and important image(s) within the **safe zone** to avoid being cut.
Extend your background all the way to the edge, beyond the trim mark for proper full bleed - if desired by the design.

To prepare your file for submitting to Overnight Prints:
Delete layer **safe zone & instructions** and
leave your **Design layer** and **Art Board layer** only. Do not delete the locked **layer Art Board**; this will ensure your
file remains at the full bleed size when uploaded.

Save your file in .PDF, .EPS, .TIF , or .JPG format, in CMYK Color mode, with a resolution of 300 DPI.

Note: You may also submit your files in **.AI (Illustrator version 8 or earlier),** but our file uploader does not accept .AI files saved
for versions later than Illustrator 8.
